

I want to express my unhappiness at the possibility of the cancellation of my XM Radio service. I live in a remote area that only offers 2 radio stations, XM radio is my saving grace for keeping in touch with various types of music. It provides me the ability to listen to so many different types of music that aren't even offered in major cities. So many large radio markets will only play Top 40 music which only appeals to young people, I appreciate that XM offers music for all ages and people. The only way I can listen to some of the music is to spend the big bucks for a cd collection, which I can't afford. Being able to only pay 9.95 for over 100 channels is amazing and I would be lost without it.

Please give the American public the ability to listen to what they want and not make NAB force you to cancel my XM service. There are too many American people who can't even get radio service that are so lucky to now have XM radio.

Without XM I would only be able to listen to Country or Top 40 channel.....please don't make me go back to that.

Thanks so much
